Responsible Agencies

REQUEST FOR IDENTIFICATION OF APPLICABLE OR RELEVANT AND APPROPRIATE REQUIREMENTS FOR ANOMALY AREA 3 AT THE FORMER MARINE CORPS AIR STATION (MCAS) EL TORO, CALIFORNIA

Dear Responsible Agencies:

The California Department of Toxic Substances Control (DTSC) has received a request from the Department of the Navy (DON) to provide potential state and local Applicable or Relevant and Appropriate Requirements (ARARs), and any to-be-considered (TBC) criteria, advisories, guidance or proposed standards that may apply in the preparation of a Remedial Investigation / Feasibility Study (RI/FS) for Anomaly Area 3. The enclosed summary from the Navy provides a description of Anomaly Area 3, contaminants found at the site, and the alternatives being sought.

DTSC, as an agency overseeing the remedial activities at the base, is responsible for contacting state and local agencies that have potential sources of ARARs and TBC. DTSC hereby requests your input for the following three (3) main types of ARARs: chemical-specific, location-specific, and action-specific. Chemical specific ARARs are usually health or risk-based numerical values or methodologies used to determine acceptable concentrations of chemicals that may be found in or discharged to the environment. Location specific ARARs are generally restrictions placed on the concentrations of hazardous substances or the conduct of activities solely because they are in environmentally sensitive locations. Action-specific ARARs are usually technology-or activity-based requirements or limitations on actions or conditions involving specific substances.

Please provide your potential ARARs/TBC and any other information by **August 24, 2005**. If you have any questions, please call me at (714) 484-5395.

Sincerely,

Frank Cheng, P.E.
